

DBP Clinical Skills: Resident Feedback Form

Your name (resident) \_\_\_\_\_  
Patient description (no PHI, please) \_\_\_\_\_  
Feedback from (faculty name) \_\_\_\_\_  
Date \_\_\_\_\_

A typical DBP clinical visit involves many activities including:

1. Preparing for a clinical visit
  - a. Collecting and understanding available data (medical records, educational records, psychological testing)
  - b. Considering any clinical evidence base
2. Communicating with patient and family
  - a. Taking a relevant history
  - b. Completing developmental assessment and/or neurobehavioral assessment
  - c. Completing a physical examination
3. Working as part of a clinical team
  - a. Interpreting data collected during the visit (interview, examination, testing)
  - b. Establishing a differential diagnosis and identifying a primary diagnosis
  - c. Summarizing recommendations

Faculty suggestions based on observed clinical visit

Things that you did well during the clinical visit:

Things that you can work on during your next clinical visits:
