

Site-specific Learning Objectives

KidScope, Santa Clara Valley Medical Center

Description

KidScope is a subspecialty pediatric clinic at Santa Clara Valley Medical Center (SCVMC) that represents a collaboration between the department of pediatrics and the department of mental health. The clinic provides care for children and youth with developmental and behavioral problems. KidScope provides support and evaluation to patients who have conditions including: ADHD, Autism Spectrum Disorder, Behavioral Problems, Developmental Delays, and Learning Problems.

Resident Role and Expectations

- One full-day clinic experience; one half-day clinic experience
- The full-day clinic experience involves the interdisciplinary team evaluation of a young child.
- The half-day clinic experience involves the medical evaluation of a school-age child and/or follow-up visits for pharmacotherapy.
- Pediatrics residents will function as members of the developmental-behavioral pediatrics team, primarily in an observer role. Direct supervision will be provided in the form of in-room modeling and demonstration of the assessment process by clinic attendings.

ADHD: clinical practice guideline for the diagnosis, evaluation, and treatment of attention-deficit/hyperactivity disorder in children and adolescents. *Pediatrics*. 2011 Nov;128(5):1007-22.
2. Radesky J, Reddy A, et al. "When the prescription pad is not enough": attention-deficit hyperactivity disorder management 2.0. *J Dev Behav Pediatr*. 2013 Feb;34(2):138-40.

Address

KidScope
828 South Bascom Ave., Ste 100
San Jose, CA 95128

Educational Goals

Experiences at KidScope will enable trainees to:

- Deepen their understanding of the diagnostic process and follow up for children and youth with developmental and behavioral problems
- Become familiar with pharmacological treatments that may be used for children and youth with various behavior problems, especially ADHD

Learning Objectives (associated with ACGME 52 competencies)

Because of participating in the KidScope experiences, residents will develop competencies with regard to:

PATIENT CARE

- PC9. Counsel patients and families - Describe effective strategies or approaches for communicating information about diagnosis and management to families.

SYSTEMS-BASED PRACTICE

- SBP4. Work effectively in various health care delivery settings and systems relevant to clinical specialty - Compare and contrast diagnostic and treatment approaches observed at LPCH Developmental Consultation Program, Center for Developing Minds, and KidScope.
